REPORT ON ONE DAY WORKSHOP ON

"Pest and Disease Management through Organic Approach"

Organized by: Department of Botany, T.S Paul Manipur Women's College, Mongshangei, Imphal West.

The Department of Botany of T.S Paul Manipur Women's College, Mongshangei, organized a one-day workshop on "Pest and Disease Management Through Organic Approach" on 24th May, 2018 at the Botany Department of this College. The workshop aimed to create awareness among participants about sustainable and eco-friendly methods of managing pests and diseases in Organic farming and practices.

The workshop was inaugurated by Dr. N. Shachi Devi, Principal and Thiam Nandita Devi, HOD, Botany Dept. of T.S Paul Manipur Women's College, Mongshangei. Prof. Kh. Ibohal, Head, Entomology, CAU, Imphal was the speaker for technical session (Topic: "Different Organic Approaches for disease and pest Management in Kitchen-Garden").

Objective:

The primary objective of the workshop was to educate participants on organic approaches to pest and disease management, emphasizing the importance of sustainable and environmentally friendly practices in agriculture, Horticulture, Kitchen Garden etc.

Sessions and Highlights:

The workshop comprised session conducted by eminent speakers and experts in the field of organic farming and pest management. The sessions included:

Keynote Address:

Prof. Kh. Ibohal, Head, Entomology, CAU, Imphal, a renowned expert in Entomology, delivered the keynote address. He emphasized the significance of adopting organic approaches to mitigate the adverse effects of chemical pesticides on the environment and human health.

Organic Pest Management Techniques:

Practical sessions were conducted to demonstrate various organic pest management techniques, including companion planting, crop rotation, and the use of biopesticides. Participants actively engaged in hands-on activities, gaining practical insights into implementing these techniques in their own agricultural practices.

Disease Management Strategies:

The workshop also focused on organic methods of disease management, with experts discussing the use of resistant plant varieties, cultural practices, and natural remedies. Case studies were presented to illustrate successful applications of these strategies.

Interactive Discussions:

Participants had the opportunity to engage in interactive discussions with the speaker, asking questions and seeking advice on specific challenges they faced in their farming practices. The exchange of ideas and experiences enriched the learning environment.

Conclusion:

The one-day workshop on "Pest and Disease Management Through Organic Approach" was a resounding success, fostering a greater understanding of sustainable agricultural practices. Participants left with valuable insights and practical knowledge that they could apply to promote healthier and more environmentally friendly farming methods.

Acknowledgments:

The Department of Botany extends its gratitude to the speaker and participants for their contributions and support, making the workshop a meaningful and impactful event.

Recommendations:

It is recommended that such workshops be organized regularly to keep farmers and agricultural enthusiasts updated on the latest advancements in organic farming and pest management.

Future Initiatives:

The Department of Botany expresses its commitment to organizing more workshops, seminars, and training programs to promote sustainable agriculture and contribute to the overall well-being of the environment and society.
